Re: Request for Reconsideration of Applicability Determination  
Aemerge RedPak Services Southern California, LLC  
Hesperia, CA

Dear Ms. Mia:

Thank you for your July 31, 2018 e-mail providing EPA's follow-up questions to our June 19, 2018 meeting. Accompanying this letter are responses by Aemerge RedPak Services Southern California, LLC (RedPak) to EPA's Question Nos. 6, 10, 11, 13 and 14 regarding our large Carbonizer/Gasifier System and responses to EPA's Question Nos. 2 through 6 regarding our mid-sized Carbonizer/Gasifier System (referred to as "Small Py Unit").

Responses to the remaining questions contain confidential proprietary information and trade secrets and will be provided separately under a confidential business information claim.

The only correction to the descriptions is that the large Carbonizer/Gasifier Systems can process up to 7,750 pounds per hour.

We have provided detailed responses which we hope will enable EPA to conclude its review. However, we have set aside Wednesday, September 5, 2018 to be available for a conference call to answer EPA's remaining questions, if any, after review of the responses. Please let me know if this date is open for EPA and a convenient time to schedule the call.

In the meantime, please contact me if you need any additional information. Thank you for your time and consideration of this matter.

Sincerely,

Aemerge RedPak Services Southern  
California, LLC

Landon C. G. Miller  
COO
